Dr. Betty Carol Graham
Superintendent's Remarks

This document is designed to provide our communities a report card that uses multiple measures in an equitable way to report success in or lack of success in academic achievement/growth, meeting college, career, and citizenship ready standards, graduation rates and other student success measures. This also includes providing adequate facilities, technology enhancements, increased arts, extra-curricular academic and athletic opportunities, and wise use of our public dollars. Our students deserve a school system that prepares them for life after graduation. This involves more than a score based on a test given one time a year that has been determined to be unreliable and not aligned with Alabama’s College and Career Ready Standards.

TALLAPOOSA COUNTY SCHOOLS ARE MORE THAN A TEST SCORE!
